

Sachin Singh Rajawat

☎ +91 9826161346 | ✉ sachinrajawat38@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📄 LeetCode

Skills

Languages: Java, C++, Python, JavaScript, TypeScript, SQL

Frameworks and Libraries: React.js, Next.js, Node.js, Express.js

Databases and Tools: MongoDB, MySQL, Redis, Git, Docker, OpenAI API, Power BI

Concepts: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, System Design, RESTful APIs, Microservices, Authentication

Experience

MAQ Software

May 2025 – May 2026

Associate Software Engineer

Noida, Uttar Pradesh

- Migrated 200+ applications to a centralized dependency management system by replacing manually pinned versions with standardized references across JVM services
- Resolved build and dependency validation issues during onboarding, standardizing 7–14 libraries per application to ensure compatible and stable releases
- Implemented dual write logic for a large scale configuration migration, updating schemas and protobufs, and validating changes across 8+ Premium flows in test and production environments

Outlier

Sept 2024 – Jan 2025

AI Data Specialist

Remote

- Designed 200+ evaluation prompts across coding, math, and reasoning domains to assess large language model performance and instruction-following capability
- Ranked 400+ model-generated responses across multiple model versions, improving post-training data quality through structured feedback aligned with RLHF evaluation workflows

Projects

Codebase Onboarding Assistant

Live

- Built and deployed a full-stack RAG application that indexed 20,000-line GitHub repositories into Qdrant in under 60 seconds at \$0.005 per repository using tree-sitter AST chunking and OpenAI embeddings
- Designed hybrid retrieval that merged top-8 vector search with exact symbol-name matching across 2,000+ code chunks, improving precision on direct-identifier queries that pure vector search missed
- Implemented Server-Sent Events token streaming with line-numbered GitHub citations on every answer, delivering source-grounded responses and reducing hallucinated file and function reference errors in codebase search

Tech Stack: React, Node.js, MongoDB, Qdrant, OpenAI, tree-sitter

FixItNow – Home Services Marketplace

Live

- Built a full-stack home-services marketplace as a TypeScript monorepo with Next.js and Express, sharing Zod schemas across web and API to enforce a single validation contract end-to-end
- Implemented JWT authentication with 15-minute access tokens and refresh tokens stored in Redis, supporting single-use rotation and full session revocation on logout
- Prevented double-booking via a MongoDB partial unique index on active bookings that permits rebooking after cancellation, verified by 104 integration and component tests

Tech Stack: TypeScript, Next.js, Express, MongoDB, Redis, JWT

Achievements

- Solved 800+ problems on LeetCode with a maximum rating of 1786 [Link]
- Solved 100+ problems on GeeksforGeeks [Link]
- Active on Codeforces with a maximum rating of 1071 [Link]
- Earned the Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) [Link]

Education

Lovely Professional University

2022 – 2026

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.19/10

Jalandhar, Punjab
