Skills

Languages: Java, JavaScript, SQL, C++
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, DaisyUI
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MySQL, Redis
Cloud & DevOps: Microsoft Azure, Docker, CI/CD, Vercel, Render
Tools: Git, GitHub, Postman, VS Code, Cursor, Claude
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, SDLC, Agile

Experience

MAQ Software **May 2025 – May 2026**
Associate Software Engineer *Noida, Uttar Pradesh*

- Completed a **3–4 month** structured training program in **HTML**, **CSS**, **JavaScript**, **React.js**, and **Microsoft Azure** through technical lectures, hands-on assignments, and show-and-tell presentations to peers.
- Upgraded **Version Set**, a centralized dependency management system, in **150+ GitHub repositories** for a client engagement, resolving **dependency conflicts** and migrating a service onto it using **Gradle**.
- Developed and maintained **responsive UI components** for **Training Hub**, an internal web application tracking trainee profiles, learning tracks, projects, marks, and progress, fixing UI issues and testing across **browsers and screen sizes** based on requirements and team feedback.

Outlier AI **Sept 2024 – Jan 2025**
AI Data Specialist | Contract *Remote*

- Engineered **200+ evaluation prompts** across coding, math, and reasoning domains to benchmark **LLM** instruction-following and output quality for post-training assessment.
- Ranked **400+ model-generated responses** across multiple LLM versions, delivering structured **RLHF** feedback that improved fine-tuning data quality across post-training pipelines.

Projects

CodeArena – Coding Practice Platform **Live**

- Developed a LeetCode-style platform with **React**, **Node.js**, **Express.js**, and **MongoDB**, exposing **17 REST API endpoints** and a **Monaco** editor to solve problems in **3 languages** (C++, Java, JavaScript) via the **Judge0** API.
- Secured the app with **JWT** authentication in httpOnly cookies, **bcrypt** hashing, **role-based access control**, and a **Redis** token blocklist; capped Run and Submit at **10** and **5 requests/min** per user to protect execution quota.
- Created an admin panel that verifies reference solutions in **3 languages** against every visible and hidden test case before publishing a problem, added a **Google Gemini** hint assistant, and deployed on **Vercel** and **Render**.

Tech Stack: React, Redux Toolkit, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Mongoose, Redis, JWT, Judge0 API, Google Gemini API, Vercel, Render, Git

DSA Field Guide – Interactive Algorithm Visualization Platform **Live**

- Architected a **React SPA** modeling **6 algorithms** (Sorting, Pathfinding, BST) as pure functions returning step snapshots, enabling scrubbable step-back/forward playback and **DOM-free unit testing**.
- Implemented **5 core algorithms** (Bubble Sort, Merge Sort, Quick Sort, BFS, and Dijkstra's) with a hand-rolled **binary min-heap**, plus a recursive-backtracker maze generator and weighted-grid pathfinding.
- Built a **race mode** running **three sorting algorithms** in parallel with synchronized playback, and shipped with **14 unit tests**, **GitHub Actions CI**, and **Vercel deployment** with SPA-rewrite routing.

Tech Stack: React, JavaScript, HTML, CSS, Tailwind CSS, React Router, Vite, Git

Achievements

- Solved **800+ problems** on LeetCode and participated in **50+ contests**, achieving a maximum rating of **1700+** [Link]
- Solved **100+ problems** on GeeksforGeeks [Link]
- Active on Codeforces with a maximum rating of **1000+** [Link]
- Active on CodeChef with a maximum rating of **1500+** [Link]

Education

Lovely Professional University **2022 – 2026**
Bachelor of Technology in Computer Science and Engineering | CGPA: 8.25/10 *Jalandhar, Punjab*
